

11 STAINED GLASS

Color this stained glass design or make one of your own. Then color it lightly with crayon. Get a piece of dark construction paper and do the following:

1. Cut a round hole the same size as your rose window design.
2. Trim around your design, leaving a 1/2 inch border.
3. Glue the design to the construction paper, centered on the hole you cut.
4. Hang your design in a window and enjoy the light passing through.
